

LEARNINGS 1st KDT-CALLS INSIGHTS AND TIPS FOR FUTURE CALLS

Ana Almansa | KDT PAB Lead Delegate
19.10.2022 | Wien

THINK STRATEGICALLY

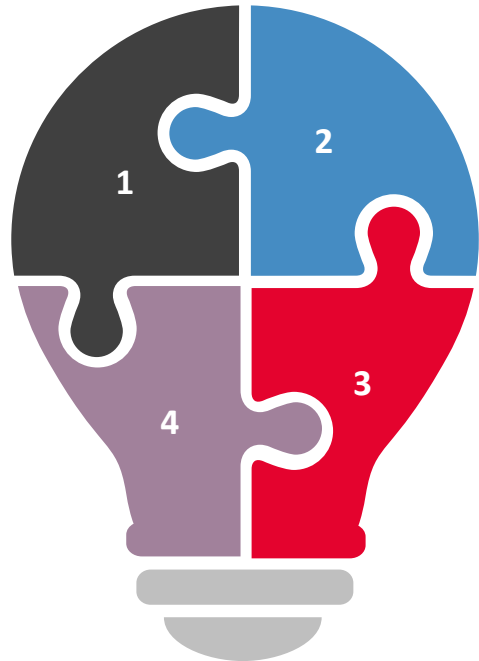

Take advantage of this **opportunity for EU and national funding and transnational networking....**

... but don't lose yourself in the complex structure of the projects:

Focus on concrete, realistic goals, with an appropriate allocation of resources.

Bildunterschrift oder Quelle angeben

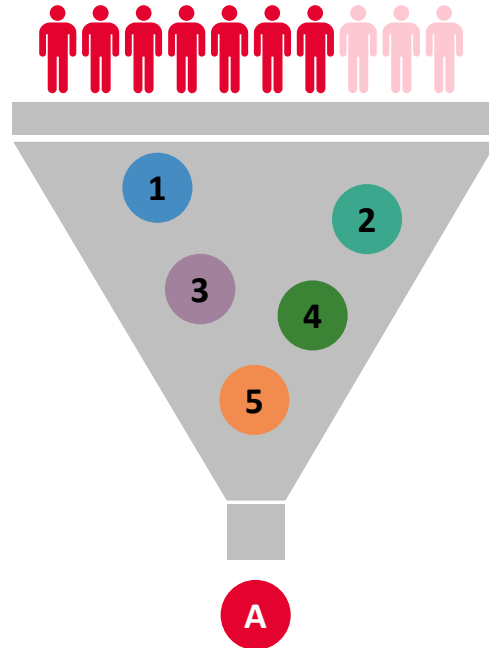

EFFICIENCY AND EFFECTIVITY

Benefit from the fact that a great part of the complex and time-consuming coordination effort is done by organizations with corresponding resources and experience (the **effort of submitting a proposal remains manageable** for the average partner).....

.... but reserve sufficient time to follow up on the **requirements of the EU and FFG submission portals**, as well as the **coherence and completeness** of the contributions to the project description requested by the coordinator and by the national authority.

COMPLIANCE WITH ESSENTIAL ELIGIBILITY CRITERIA

Take good note of the national eligibility criteria, especially the person*month ratio for Austrian partners:

PM company partner $\geq 1,5$ x PM research partner

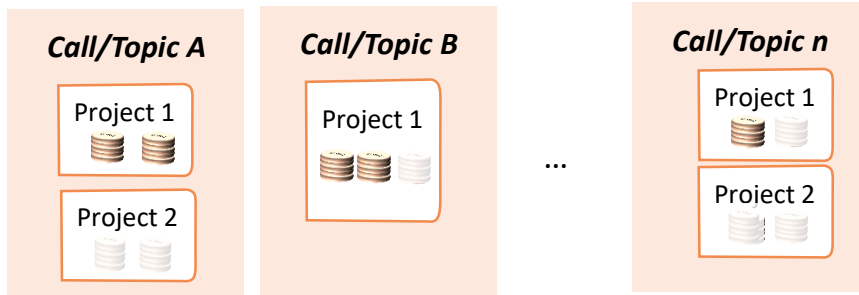

The ratio must remain fulfilled at the end of the project

Make sure that the planned composition of the project team is realizable.

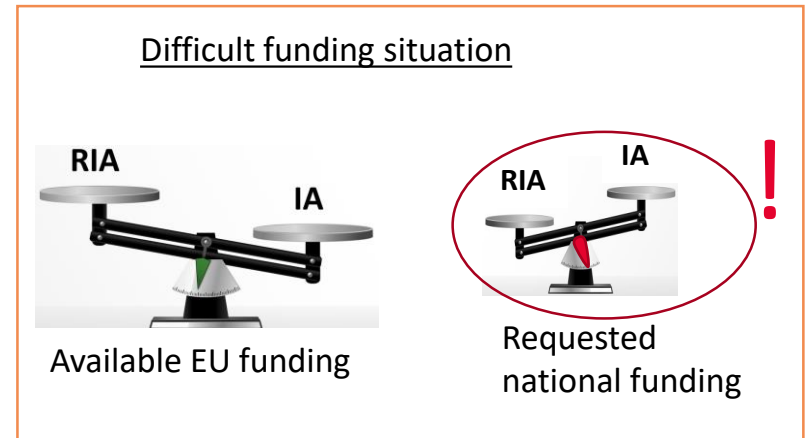

NATIONAL FUNDING AND TOPICS

The total amount and distribution for 2023 is not yet fixed, but...

- The **number of topics** has increased in KDT in comparison with ECSEL (focus topics)
- Consider the size of your planned projects, especially if you participate in many projects, as the **available national budget is restricted**.
- The **distribution of EU funds** according to the Work Programme already gives an indication of weighting for the **calls/topics**.

Legend:  National budget available
 No further national budget available

VIELEN DANK FÜR IHRE AUFMERKSAMKEIT!
